

**Inmates undergo clinical management and therapeutic interventions over a minimum period of seven months to improve their functioning skills and their mental health.**

pioneer cohort of inmates who successfully completed the series of enhanced incare programmes.

inmates develop pro-social abilities and better mental health functioning in preparation for their reintegration into the community.

**SPECIALISED REGIME: PSYCHIATRIC HOUSING UNIT**

Since the operationalisation of the Psychiatric Housing Unit (PHU) in November 2013, CWP has been working closely with staff from the Institute of Mental Health (IMH) to adopt a multi-disciplinary approach in the treatment and rehabilitation of Offenders with Mental Disorders (OMDs). PHU provides a structured psycho-education programme over three phases, namely the Stabilisation, Intervention and Recovery phases. Occupational therapy activities are also included to help

Inmates undergo clinical management and therapeutic interventions over a minimum period of seven months to improve their functioning skills and their mental health before they are assessed for their suitability to be discharged back to the mainstream population. Inmates who have gone through the programme were reported to have shown behavioural improvement and were coping well in the mainstream housing unit.

**OPERATIONALISATION OF COMMUNITY REHABILITATION CENTRE**

Following the recommendation of the Taskforce on Drugs led by Senior Minister of State for Home Affairs and Foreign Affairs, Mr Masagos Zulkifli, Cluster C undertook the major project of operationalising the Community Rehabilitation Centre (CRC). CRC adopts a novel approach of a community set-up to address the drug use of moderate-risk young drug abusers. CRC residents are able to continue with their jobs or studies in the community while being provided with a well-rounded programme to tackle their addictions, strengthen positive relational bonds and increase their resilience. CRC began operations under the charge of Superintendent, Selarang Park Community Supervision Centre (SPCSC) in May 2014.

**CARVING OFF SELARANG PARK COMMUNITY SUPERVISION CENTRE TO THE COMMUNITY CORRECTIONS COMMAND**

In line with SPS's strategy to strengthen its aftercare and community corrections capabilities, the Community Corrections Command (COMC) was set up in August 2014, incorporating SPCSC and other units. Cluster C began preparations in May 2014 to hand SPCSC over to COMC. By July 2014, the handover in areas such as manpower and assets were completed, while Cluster C continued to provide interim support in corporate services and staff development functions until March 2015.

**ENHANCED AFTERCARE INTELLIGENCE OPERATING MODEL**

In anticipation of the management challenges of a higher number and also higher risk levels of inmates placed on new community corrections initiatives, Intelligence Division and Cluster C Intelligence Unit spearheaded efforts to enhance collaborations between internal stakeholders and external counterparts. A greater level of synergy with SPS's Psychological & Correctional Rehabilitation Division, the Singapore Police Force and the Central Narcotics Bureau facilitates strategic planning and creates a conducive platform to promote information sharing in the aftercare arena as well as help in the overall management of supervisees.

The foundational work of Intelligence Division and Cluster C Intelligence Unit paved the way for the intelligence unit in COMC to extend its outreach into the community.

CRC is situated in the community with an accommodation capacity of 50. It provides a structured programme for residents with the involvement of their families to aid in their rehabilitation.

Residents in CRC are able to continue with their education or employment in the day. By working hand-in-hand with their families and the community, the structured regime at CRC aims to prevent young male drug abusers from becoming repeat drug offenders.

**ENHANCED DRUG REHABILITATION REGIME: A DIFFERENTIATED APPROACH TO DRUG OFFENDER INTERVENTION**

The enhanced drug rehabilitation regime was piloted in January 2014 to provide a differentiated approach to the rehabilitation of drug offenders, taking into consideration their general risk of re-offending and level of dependency on drugs. All Drug Rehabilitation Centre (DRC) inmates admitted on or after 1 January 2014 will undergo the enhanced drug rehabilitation regime. The first batch of drug offenders under the enhanced regime was transferred to SPCSC in July 2014 for their Community Based Programmes (CBP).

Supervisees are emplaced on CBP based on their individual risk assessments. Supervisees assessed to have greater risks and needs are required to attend casework and counselling sessions, comply with curfew hours, be electronically monitored and be subjected to urine reporting under the conditions of the Central Narcotics Bureau Supervision Orders.

ROLES & FUNCTIONS

Ensure that the various aspects of **post-release supervision and community rehabilitation** are integrated so that they will be mutually supportive

**VANGUARD OF REHABILITATION BEYOND PRISON WALLS**

Community Corrections Command (COMC) was formed on 1 August 2014. Bringing together prison officers from Selarang Park Community Supervision Centre (SPCSC) and specialists from Correctional Rehabilitation Services Branch (Community) [CRSB (Community)] under a single Command, COMC sharpens SPS's focus on rehabilitation in the community and leverages on the two units' combined skills and knowledge. Together with its community partners and volunteers, COMC aims to reduce re-offending and help offenders reintegrate successfully as contributing citizens.

**COMMUNITY REHABILITATION CENTRE: A STEP-DOWN ARRANGEMENT FOR YOUNG MALE DRUG OFFENDERS**

The Community Rehabilitation Centre (CRC) was established under the Taskforce on Drugs recommendations to improve upstream intervention for young drug abusers. It serves as a step-down arrangement for male drug abusers aged 16 to 20. The first batch of drug abusers was transferred to CRC on 5 May 2014.

COMC

**MANDATORY AFTERCARE SCHEME**

The Mandatory Aftercare Scheme (MAS) is a compulsory structured aftercare regime that aims to facilitate the successful reintegration of high-risk offenders back into society. This is achieved through intensive rehabilitation programmes at the incare phase and structured community supervision and rehabilitation in the aftercare phase. The MAS was introduced with the Prisons Act amendments which took effect on 1 July 2014. This new mandate extends SPS's role outside prison walls, and it represents a key milestone in SPS's development into a correctional agency.

There are three phases in MAS, namely the Halfway House, Home Supervision and Community Reintegration phases.

During the supervision period in the community, supervisees will attend casework and counselling sessions. They will also be required to comply with curfew hours, be electronically monitored and undergo urine tests to ensure they stay crime-free.

**The Mandatory Aftercare Scheme is a compulsory structured aftercare regime that aims to facilitate the successful reintegration of high-risk offenders back into society.**

**COLLABORATION WITH INTERNATIONAL EXPERTS: EPICS TRAINING 2014**

Effective Practices in Community Supervision (EPICS), developed by the University of Cincinnati Corrections Institute, is one of the key training programmes that staff in COMC undergo.

To benchmark against local expertise and further develop correctional casework capabilities, ten SPS officers were selected to deepen their knowledge in community supervision through the EPICS Train-For-Trainers workshop in March 2014.

They were trained under the close guidance of Dr Paula Smith, Associate Professor in the School of Criminal Justice and Director of the Corrections Institute at the University of Cincinnati. The programme enhanced the officers' capabilities in professional delivery and proficiencies in correctional community supervision.

**JOURNEY TOWARDS DESISTANCE: COMMUNITY PARTNERS**

The Enhanced Supervision Scheme (ESS) was implemented in 2012 for drug offenders with high risks of re-offending upon their release.

From COMC's experience thus far, the involvement and support from the community is critical. The Community Action for the Rehabilitation of Ex-Offenders (CARE) Network and volunteers play a key role in an offender's reintegration journey. Together with Correctional Rehabilitation Specialists and Reintegration Officers, COMC strives to empower supervisees with the resources and support necessary to persevere towards reintegration. They, too, have to work hard and take personal responsibility over their reintegration.

Below is a story of a recovering supervisee:

"Hamid had completed his casework and booster sessions in April 2014. He found satisfaction and meaning in his crime-free lifestyle in the community since his release in 2012. He is thankful for the support received while undergoing ESS. Currently, he is residing at the New Hope shelter, and is gainfully employed as a car washer. He is working hard towards securing a HDB rental flat so that he would have a roof over his head. He found a new hobby in running, and is a committed participant of the Yellow Ribbon Run. He intends to run for the third time in 2015."

on enhancing the capabilities of SPEAR operators to respond to an armed attack on the Changi Prison Complex (CPC) by undergoing advanced training to manage armed adversaries.

As the quality controller for core tactical skills in the department, SPEAR focuses on refining policies with regard to tactical and operational matters. Together with the clusters and relevant staff units, SPEAR serves as a key member of the Tactical Review Panel, undertaking the advisory and decision-making role for all tactical related matters. SPEAR's tactical training curriculum was also accredited by the Institute of Prevention of In-Custody Death (IPICD), thus enhancing and ensuring the robustness of the training system.

**STRENGTHENING PHYSICAL AND DYNAMIC SECURITY OF EXTERNAL OPERATIONS**

As part of the continuous effort to raise the operational capabilities and level of professionalism of external escort officers, a multi-purpose haversack and a shackle pouch have been designed and issued to these officers. Previously, escort officers used various methods to store documents and restraint equipment during escort duties. With the issuance of

the standardised purpose-designed haversack and shackle pouch, escort officers are no longer hindered by the items that they have to carry. In fact, they are even able to carry additional items, thus enhancing their operational capabilities to respond to different situations.

Besides developing the operational competencies of the officers, Prisons External Operations (PEO) is also enhancing the infrastructural security of the State Courts. Additional CCTV cameras would be placed at strategic locations such as court holding areas, thus providing State Courts Lock-Up (SCLU) staff with enhanced monitoring capabilities and the

Oversee and manage external facilities and service touchpoints across SPS

**SECURE, SWIFT, STEADFAST – PROTECTING SPS AND ITS ASSETS FROM DANGER AND HARM THROUGH QUICK RESPONSE AND DETERMINATION**

At first glance, the units under Operations & Security Command (OSC) may seem to be a disparate group as they perform very different functions. Upon closer inspection, however, their functions are interconnected and the synergy between these units facilitates the overall operations in SPS.

**ENHANCING OPERATIONAL AND TACTICAL CAPABILITIES**

The Singapore Prisons Emergency Action Response Force (SPEAR) constantly explores ways to enhance its operational capabilities to perform its core functions of responding to prison contingencies and performing high-risk escort duties. This has led to the introduction of critical equipment such as the FN303P which raises the operational capabilities of SPEAR operators when responding to contingencies and executing other core functions. In addition, SPEAR has embarked

**To enhance the overall visit experience, the PLCs embarked on a series of projects to upgrade their facilities.**

ability to respond more quickly during contingencies. Biometric and HID access points would be installed at key locations such as the entrance and offices to further enhance the security of the premises.

**ENHANCING OVERALL VISIT EXPERIENCE THROUGH UPGRADING OF FACILITIES**

The Prison Link Centres (PLCs) in Changi, Geylang Bahru and Jurong East are key visitor touchpoints for SPS. To enhance the overall visit experience, the PLCs embarked on a series of projects to upgrade their facilities. These projects included an upgraded turnstile system that is integrated with the Complex Access Management System (CAMS) to streamline access control procedures for personnel entering PLC premises. The new turnstiles brought about a faster response time in the clearance of visitors, thus enhancing their visit experiences. This integration also aids in the management of contingency situations such as fire evacuations.

**TOWARDS A BETTER SECURED COMPLEX**

CPC Security manages the perimeter security and access control of CPC. The two main access control points of CPC Security are situated at the Complex Main Entrance (CME) and the Transit Centre (TC). TC was set up to facilitate the effective screening of vehicles entering and leaving CPC, while maintaining a high vehicular throughput. With the increasing number of facilities operating in CPC such as workshops in Cluster A and B, SPEAR Base and Prison Transport Base, vehicular traffic into and out of CPC has been increasing. To cope with the additional load, an additional Vehicle Scanning System (VSS) was installed in early 2015 to complement the existing system to provide the necessary security checks while reducing throughput time.

In addition, a sheltered waiting area is being constructed near CME. Upon completion, the designated waiting area will serve as a gathering point for family members awaiting the release of their loved ones even during inclement weather. The waiting area will also allow for the better management of pedestrian movement into and out of CPC.

**ASIAN PRISONS LOCKDOWN CHALLENGE**

SPEAR organised the Asian Prisons Lockdown Challenge (APLC) in April 2014, a biennial event that first started in 2010. APLC 2014 saw an increase in participation from foreign correctional teams, with a total of six foreign countries (four as participants and two as observers) and four local teams taking part in the event. SPEAR did SPS proud by emerging as the overall champion. Feedback received from both foreign and local participants were highly positive, with many expressing a strong interest to come back for APLC 2016.

**GO GREEN EFFORTS**

PLC (Changi) is in the process of achieving the Green Mark Gold Plus certification from the Building and Construction Authority, which bears testament to SPS's efforts to go green. A green corner was set up to educate the public on caring for the environment, and recycling bins were placed within the building to facilitate and encourage recycling efforts. New taps with better water efficiency ratings were also installed in all toilets to regulate the usage of water, thus helping to conserve precious water resource.

On top of the enhancement of facilities, CPC Security, together with Infrastructural Development Branch, completed the installation of the Solar Panel System at TC in 2014. The 100KWp Solar Panel System is able to supplement the electricity power supply to TC for its operations. Besides reaping cost savings, the project also marks the department's continual efforts to support environmentally friendly and sustainable clean energy sources as part of its commitment to the Go Green Framework.
